

BULLIONBLOCK

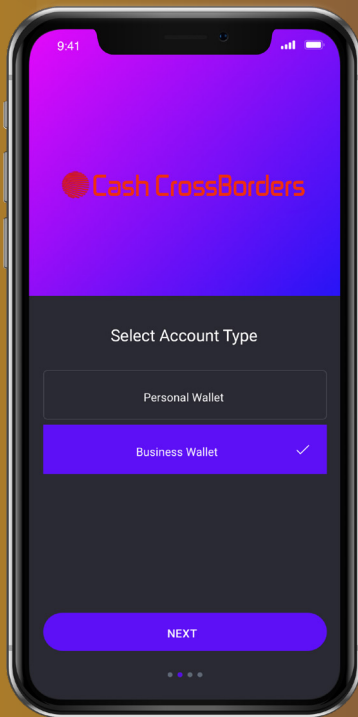

BORDERLESS WALLET

DIGITAL PAYMENT GATEWAY

Redefining Global Financial
Services for People & Commerce

Digital Mobile Wallet Payment Gateway

BULLIONBLOCK PTE LTD will operate two highly secure state of the art digital (fintech) financial technology services to the world market, namely the **CashCrossBorders.com** payments and remittance Wallet App brand designed to operate with live connection to payments rails, and the **BullionBlock.cash** Chat (messenger) Wallet App brand which will offer the bullion-backed money-preservation account operating on the company blockchain technology platform.

Our Wallet Apps are designed to be inclusive mobile borderless digital payments fintech product services and are supported by our worldwide multi-channel network partners enabling 24/7 accessible control over personal and business financial transaction that is unrivalled.

The Blockchain Powered Chat Wallet is a seamless Messenger App which can handle millions of concurrent chat users, with almost all chat features available on Whatsapp and Telegram combined.

The BullionBlock Wallet Payment Gateway enables people worldwide with access to a smart phone to finally have autonomous control over their money in the palms of their hands.

Our mobile financial solutions offer instant global remittances, online mobile payments, merchant payments and peer-to-peer transactions.

Unlike traditional financial institutions, the BullionBlock global digital transactions are fast, frictionless, low-cost, and secure free of third-party intervention.

The BULLIONBLOCK Blockchain Financial Technology Ecosystem is a customer-centric lifestyle wealth-preservation payments platform, enabling real-time P2P transactions through the instant messenger chat feature and or the QR code.

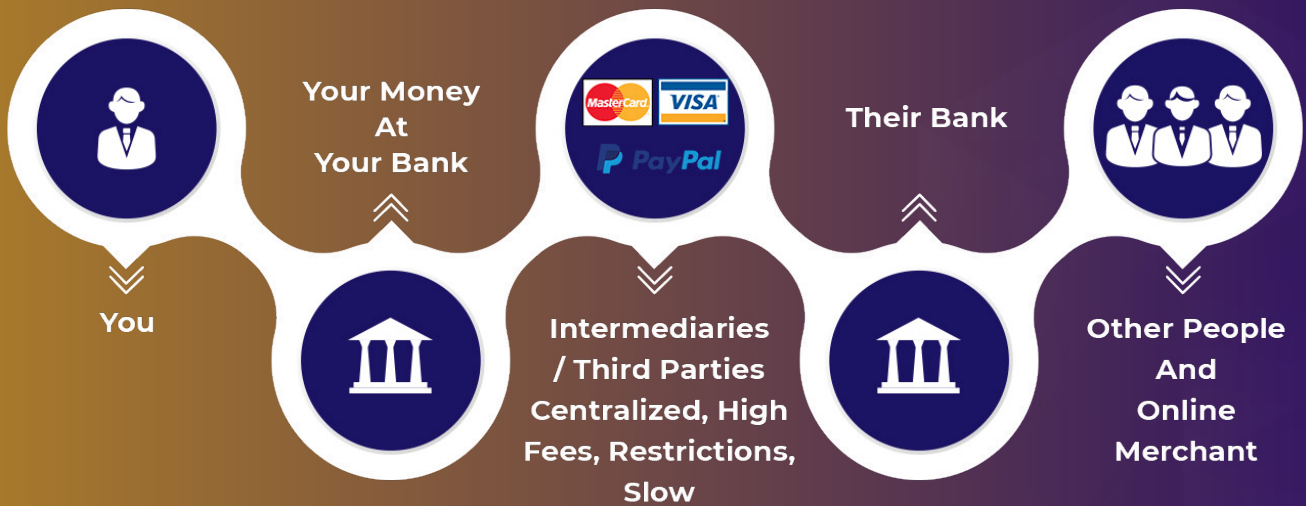

The **CashCrossBorders.com** Wallet app will operate in jurisdictions that prohibits bullion backed financial services.

The BullionBlock Difference

BEFORE

AFTER

Digital FinTech Ecosystem

Financial Freedom App

We use decentralized Blockchain Technology to create new ways to manage money, send and receive money, buy, sell and pay bills.

Technology-based Solutions

Our FinTech Platform enables agility, efficiency and accuracy by using operational advancements through robotic process automation (RPA), Distributed Ledger Technology (DLT) and application programming interfaces (APIs).
